Pain Control

Cancer pain should be addressed quickly and aggressively. The treating physician is the first contact, but other resources are available:

Palliative Care is a program with **Lourdes Hospital**, located in Binghamton, NY. Palliative care specializes in relieving the symptoms and stress of serious illness. Symptoms may be physical, emotional, or spiritual. The goal is to improve quality of life for you and your family. Working closely with your primary physician, we provide:

- Expert treatment of pain and other symptoms
- Guidance with difficult treatment choices
- Emotional and spiritual support for you and your family
- Coordination of care
- Close communication and compassionate care
- Advance Care Planning

Palliative care consultations can be done in your own home, in an assisted living facility, nursing home, or hospital. Contact them for more information at 607-798-5418 or at

Additional Support for Older Adults

Older Adults:

Cancer becomes more common as people get older. When an older person undergoes cancer treatment, the support s/he needs may relate as much to aging as to the cancer itself. There are local agencies that can provide support to older adults.

Tioga Opportunities, Inc. Department of Aging (607-687-4222) is an excellent resource for assistance with aging-related issues such as housing, home care, health insurance, caregiver services, and more. The office also controls the local “Meals on Wheels” program, so check out their website for more information at <https://tiogaopp.org/>
